O. C. D.
ARTISIA, OFFICE

No well will be assigned an allowable greater than the amount of oil produced on the official test.
During gas-oil ratio test, each well shall be produced at a rate not exceeding the top unit allowable for the pool in which well is located by more than 25 percent. Operator is encouraged to take advantage of this 25 percent tolerance in order that well can be assigned increased allowables when authorized by the Division.
Gas volumes must be reported in MCF measured at a pressure base of 15.025 psia and a temperature of 60° F. Specific gravity base will be 0.60.
Report casing pressure in lieu of tubing pressure for any well producing through casing.
Mail original and one copy of this report to the district office of the New Mexico Oil Conservation Division in accordance with Rule 301 and appropriate pool rules.

I hereby certify that the above information is true and complete to the best of my knowledge and belief.

Re: Wells placed in pool

Gentlemen:

As the result of Division Order R-7307 the following described well (s) (~~has~~ have) been placed in the pool (x) shown below. This change in nomenclature has been made in our files. Please change your records to reflect the proper pool name. All subsequent reports must show this nomenclature until further notice.

Brushy Draw - Delaware

EP USA #2-0-26-26-29
EP USA #3-I-26-26-29
MWJ Fed. #1A-35-26-29
Holly Fed. #1-P-26-26-29
UCBHWW #1-M-25-26-29
UCBHWW #2-L-25-26-29

Transporters are advised, by copy of this letter, to change their records to reflect the pool name as established by this order, effective June 14, 1983.

Sincerely,

Larry Brooks
