Re: Clark
#1-G-11-26-28

Gentlemen:

The above captioned well completed as an oil well is a standard location but completed as a gas well it will be a non-standard location.

For a gas well you will need 160 acre dedication and well located 660' from outer boundaries and 330' from inner boundaries, to be a standard location.

Your well, located 1650' from the north line and 2310' from the east line, is now a non-standard location.

You will need to request a non-standard location approval from the Santa Fe office before an allowable can be approved.

Sincerely,

Rec.
7-5-85

Les A. Clements
