RE: Commingling Order CTB-297

Gentlemen:

Getty is hereby giving notice that the Salt Mountain Federal 25, Sec. 25, T-26-S, R-29-E and Salt Mountain State 36, Sec. 36, T-26-S, R-29-E in Eddy County, New Mexico, have been surface commingled.

Each well is metered separately with positive displacement meters. Production allocation will be in accordance with State Rule 309B. The meters will be proved monthly for three months; then quarterly, by strapping the tank volumes to prove the metered volumes.

Occasionally, the tank bottoms must be circulated back through the system to improve the quality of the bottom oil. This will be accomplished by shutting-in Salt Mountain Federal 25 No. 1 and opening the circulating system. The positive displacement meters for oil and water will be read prior to circulating tank bottoms and again after the circulating is completed. These recorded volumes will then be subtracted from the monthly oil and water production from Salt Mountain Federal 25 No. 1 as these volumes have already been metered.

Attached is a schematic of the current production facilities located in Section 36, T-26-S, R-29-E.

Sincerely yours,

GETTY OIL COMPANY
