Proration Unit - Ray Haskins, Operator - Aminoil State #1 ✓
Sec 22-T26S-R28E, Eddy County, New Mexico

Mr. Clements, A review of form C-102 filed by Ray Haskins on the above captioned well indicates that Mr. Haskins has included the SE/4 of the NW/4 of Section 22-T26S-R28E in the 160 acre proration unit for this well. This 40 acres is a portion of the Clark land development acreage leased to El Paso Natural and farmed out by El Paso Natural to Tom E. Moore. This acreage is now held by production.

Mr. Haskins did not contact us concerning the utilization of our acreage in his proration unit. It is my understanding that this must be approved before the well is drilled. Since we were not contacted prior to the well, we certainly do not plan to approve at this point. Our question is this: what is the next step? Do we initiate a formal protest, and if so, to whom, the state or Mr. Haskins; or does the state commission notify Mr. Haskins of his transgressions?

Mr. Clements, having not previously been in this situation, we need your expertise as to what direction to proceed. Thank you for your help with this problem.

Sincerely,

Tom E. Moore
