| Formation Name | Depth (Top) | Type of Mineral |
|------------------------------|---------------------------|---|
| <u>Rustler</u> | <u>Surface to 450'</u> | <u>Possible shallow water sand.</u> |
| <u>Rustler-Cherry Canyon</u> | <u>450' to TD (6000')</u> | <u>Expected hydrocarbons, fresh water or economical mineral deposits.</u> |

4. The proposed casing program, including the size, grade, and weight-per-foot of each string and whether new or used. (Shown on Form 9-331C)
5. The lessee's or operator's minimum specifications for pressure control equipment which is to be used, a schematic diagram thereof showing sizes, pressure ratings (or API series), and the testing procedures and testing frequency. (See attachment)
6. The type and characteristics of the proposed circulating medium or mediums to be employed for rotary drilling and the quantities and types of mud and weighting material to be maintained.

A sufficient quantity of mud and chemicals will be maintained at the well site to meet anticipated normal conditions, recognizing the time required to replenish supplies from local sources.
