(Other) Reaching Total Depth ☒

REPAIRING WELL ☐  
ALTERING CASING ☐  
ABANDONMENT\* ☐

(NOTE: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give surface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

This well has been drilled to a total depth of 3750', which is a depth sufficient to test the Ramsey and Olds sands of the Upper Delaware formation. This depth was reached April 21, 1984. Both sands were wet, but the upper Ramsey did leave slight show of oil and gas. As previously requested, it is requested that this well be considered a valid test of a valid pay zone, so as to extend this lease by drilling two years. A copy of the sample log and the daily drilling report is enclosed for your files.

18. I hereby certify that the foregoing is true and correct
