13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

We have managed to figure out a way to put this well on production and it is currently making 100 mcf per-day. No change was made in the down-hole configuration, only a modification of the type of surface equipment on the surface location. The previously proposed annular integrity test should no longer be needed.
