17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

UCBHWV FED. #9

In the J.C. Williamson MWJ Federal #2 well located in Section 35, T26S, R29E in Eddy County New Mexico, we are planning to perforate, acidize, swab test, and fracture treat the Ramsey Sand member of the Delaware Sand series at approximately 2973-2985'. When the results of the test are available, we will be better able to decide whether to plug this well or make an attempt to return it to production.

Therefore, we request 6 months from the approval date of this Sundry Notice to complete the proposed work on the MWJ Fed. #2, and to evaluate the results from this work, so as to make a decision on any future work to be done on this well.

APPROVED FOR 6 MONTH PERIOD  
ENDING 3/7/95

18. I hereby certify that the foregoing is true and correct
