13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

OSO #4 Section III. C. 1. a. requires that each sales tank shall be equipped with a pressure vacuum thief hatch and vent line valve. The purpose of the requirement is to prevent loss of product at low volume and pressure or by flashing of light ends in high gravity oil.

A fluid with an API gravity below 36 degrees will not have a significant flashing of light ends within the normal temperature range. The loss of gas from a low volume facility would be insignificant if the sales tank is vented to the atmosphere.

OSO #4 provides for granting requests for a variance from the minimum standards. Oil produced from this lease has a gravity of 39.6 and the lease produces 5 barrels of oil per day.
