13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

This well has been included in a Geological Study being performed for Tide West by Jim Brannigan(214-623-0831 - Roswell New Mexico). It was felt that additional information was needed to properly evaluate any recompletion in the Ramsey and Delaware formations. The study is in the final stages, and should be completed soon. Reactivation of the Bedina Federal #2 is anticipated; with work hopefully started during the later part of 1996. Tide West would like to request a 1 year continued "Temporary Abandoned" status for the well to allow completion of the Geological Study and evaluation of the results in order to optimize the reactivation of the well.
