

Exhibit "B"

Pressure Control Program

CIMARRON ENERGY CORPORATION
Cimarron "SM" Federal Well #1
1980' 2310' FSL, Section 25
T26S, R30E, NMPM Eddy County, NM

SURFACE CASING: 13 3/8"

1. One 2000 ps. LWS type preventer

INTERMEDIATE CASING-9 5/8":

1. One 11" 5,000 psi Type GK Hydrill preventer
2. One 11" 3,000 psi, drilling head and stripper
3. One 5,000 psi choke manifold

Blowout preventer equipment will be hydraulically actuated by 3,000 psi Koomey accumulator with remote control station on rig floor. Accumulator will have sufficient capacity to close all pressure operated devices at one time and maintain a 25% reserve.
