Dear Sir:

We have received a copy of an application filed with the Bureau of Land Management by your company for authorization to utilize the Littlefield "BO" Federal Well No. 5 as an injection well in the Delaware formation. Please be advised that the Oil Conservation Division has primary responsibility for permitting injection wells in the state.

I am enclosing a Division Form C-108 which must be filed with the Division for each injection well. In addition, it appears from your application that this operation should be classified as a waterflood project. Division Rule No. 701(G) requires a hearing before a Division Examiner for the establishment of waterflood projects.

If you need assistance filing the enclosed application or setting up a hearing, please contact me at (505) 827-8184.

Sincerely,

David Catanach  
Engineer
