Re: Proposed Plugging  
Ringer #3  
Sec. 3, T-25-S, R-26-E  
Eddy County, New Mexico

Dear Mike:

Following our telephone conversation this morning, in the event we have to plug and abandon the above referenced well, the following procedures will be followed, if you agree:

1. Circulate Class H cement from 2000' to surface inside 5-1/2" casing.
2. Cut-off casing 5' below ground level and install dry hole marker.

The wellbore's mechanical condition is as shown on the attached wellbore sketch as of this morning.

Please contact me at (214) 953-1414 if these proposed procedures are not acceptable, and I will make the necessary changes.

Sincerely,

MURCHISON OIL AND GAS, INC.

Michael S. Daugherty  
Vice President of Operations
