13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

1. Ran 2 3/8" surface flow line from #2 Bet-Net to production facilities at the #1 Bet-Net. No new surface disturbance took place as the flow line is laid next to the road. Ownership in the #1 & #2 Bet-Net wells is the same so both wells can be produced into common tank battery.
2. 12/16/92 - Notice of first production - Well was placed on pump @ 3:30 PM 12/16/92 for the purpose of production testing. Well is being produced into common tank battery on the #1 Bet-Net and is being individually monitored through a port-a-check system. We plan to production test the well on pump for up to three weeks before moving up hole to open additional perforations.

14. I hereby certify that the foregoing is true and correct
