

MULTI-POINT SURFACE USE AND OPERATIONS PLAN

PAGE 4

8. ANCILLARY FACILITIES. None required.

9. WELL SITE LAYOUT.

A. Exhibit "E" shows the well site layout with general dimensions for the location and reserve pit.

1. The reserve pit will be lined.

10. PLAN FOR RESTORATION OF THE SURFACE.

1. All pits will be back filled and all waste material removed. Land adjacent to drilling pad will be levelled.

2. Re-vegetation and rehabilitation to be completed as per BLM recommendations.

3. Prior to rig release, pits will be fenced and maintained until clean up.

4. Any oil in pit will be transferred to steel stock tank and separated and sold.

5. All clean up should be completed within 6 months of well completion.

11. OTHER INFORMATION.

1. The land is relatively flat in this area with surface dip being approximately 100 feet per mile to the Northeast. The well location and access road is situated entirely in Sections 9 & 8 which are Federally owned. Any access road not on lease will be properly permitted prior to construction.

2. No ponds, lakes, streams, water wells, or occupied dwellings exist in the area.

12. LESSEE'S OR OPERATOR'S REPRESENTATIVE:

Steve Gray, P.O. Box 1240, Graham, TX 76450  
Phone: (817)549-0780

13. CERTIFICATION.

I hereby certify that I, or persons under my direct supervision, have inspected the proposed drill site and access route; that I am familiar with the conditions which presently exist; that the statements made in this plan are, to the best of my knowledge, true and correct; and that the work associated with the operations proposed herein will be performed by Successful Bidder and its contractors in conformity with this plan and the terms and conditions under which it is approved.
