13. Describe Proposed or Completed Operations (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once Testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Yates Petroleum Corporation respectfully requests permission to make the following changes to this well:

Changes to Casing Program:

Change 13 3/8" setting depth from 500' to 550' and change casing from 13 3/8" 54.5# J-55 to 13 3/8" 48# H-40. Couplings will remain ST&C. Change 8 5/8" setting depth from 4,200' to 4,100'.

Changes to BOP Program:

We would like to nipple up a diverter only on the 13 3/8" casing rather than a 3,000 psi BOP as stated in the APD. Due to the low pressure environment in the intermediate hole and the fact that the intermediate hole consists of mostly salt containing no hydrocarbons we feel that pressure control equipment is not necessary. A 3,000 psi system will be nipped up on the 8 5/8" casing to drill the production hole.

Sincerely,

14. I hereby certify that the foregoing is true and correct
