13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Yates Petroleum Corporation wishes to move this location from the approved footages of 810' FSL and 1980' FEL to the above footages. A new C-102 is attached. The approval date ends 2-12-95 and we would like to extend that date for another 12 months. At this time we request that a 3" O.D. steel flowline be approved on the surface following the access road to the tank battery. The route is marked in purple on the attached map and is approximately 1 mile in length. The route of the road will change and is marked in green on the map. It is approximately 600' in length.
