(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Bass Enterprises Production Co. respectfully request approval of Off-Lease Storage and Measurement and surface commingling of production from the above subject wells. Production from each of the subject leases will be metered separately at the Poker Lake Unit #78 Battery prior to being commingled. Approval of this request for Off-Lease Storage and Measurement and surface commingling will allow for more efficient operations with a consolidated battery by reducing the number of stock tanks (4) and water tanks (2). Surface disturbance will also be minimized by using the existing facility. Full wellstream production will be transported via flowline to a three phase heater treater. Oil, Water and gas will be separated at this vessel. The oil and water will be metered prior to being stored in the commingled stock tanks and water tank. The gas will be metered via a separate allocation meter. Estimated production from the four (4) Wells will be 800 BW + 200 BW + 800 MCF per day. The corrected API oil gravity for the subject leases is 44.0° (sweet). Current posted price is \$13.75 per barrel. The total value will not change whether production is commingled or separate storage facilities are used.

14. I hereby certify that the foregoing is true and correct
