Re: **Poker Lake 89**  
**Eddy County, New Mexico**

Dear Mr. Williams:

Fortson Oil Company submitted Form C-104 for the referenced well on June 2, 1994. Additional Delaware pay was added per the attached Sundry notices and intent. Following the frac job of June 23, 1994, the well has come back flowing 506 BOPD, 354 MCFGPD and 199 BWPD on a 28/64" choke with 280 psi FTP. This rate exceeds the 125% maximum as detailed in Rule 502. Fortson Oil requests authorization to flow the well at these rates for up to 20 days in order to adequately test the well as permitted in Rule 504.

Very truly yours,

FORTSON OIL COMPANY
