13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

8/9/00 Installed variable choke on wellhead. Spotted test tank & layed flow line. Opened well on 1/8 in. choke - flow test into tank for 105 min. Flow @ average rate of 110 MCFGPD. Wildcat Measurement Service obtained gas sample - analysis enclosed. Shut in due to strong H2S odor.

Llano Land & Exploration CO. requests approval for Temporarily Abandon status for following reasons:

1. No "sour" gas sales line available in area.
2. Sulphur extraction unit for one well at this volume would render gas production uneconomical.
3. Drilling of additional wells on lease will add sufficient gas volume to justify sulphur extraction installation.
