**RE: C-104 TEST ALLOWABLE FOR CONDENSATE  
CORRAL DRAW 9 FEDERAL #1  
API #30-015-30201  
EDDY COUNTY, NEW MEXICO**

**Burlington Resources requests your approval for a test allowable of 3000 barrels of condensate for the month of August 1998.**

**This well has not been potential tested yet. We have had a lot of problems trying to complete this well. We got stuck several times and had to fish.**

**Currently, we are trying to unplug the perfs in the liner. We think they may be plugged off with mud. This well is currently producing 240 BC per day from partially unplug perforated interval.**

**The original and 4 copies of the C-104 went out in the mail today. A copy of the deviation survey was also mailed. Hopefully, you will get the mail by tomorrow. At the rate this well is producing, we will be running out of tank space pretty soon. Can we have verbal approval to clear these tanks within the next few days.**

**Thanks,**

*Maria Perez*
