13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

Problems: Well will barely produce above gas line sales pressure (650 psi). Well will probably need compression.

Completion Comments: This well started producing on 8-2-98 and produced until 8-7-98.
On 8-7-98 we cleaned out the lateral hole and returned to production on 8-8-98.
On 8-13-98 we acidized perms and produced from 8-13-98 to 8-20-98.
On 8-20-98 we ran pressure bombs and shut-in well for pressure build-up.

Proposed Work: We will probably return the well to production within one month. After getting the pressure data, we will evaluate if we need more pressure data. If we need more pressure data, we will probably produce the well for one month and shut-in for one month. This well has not been potential tested yet.
