Figure 1. The effect of the concentration of the *Agrobacterium* strain on the transformation efficiency of *Agrobacterium* strain 104. The concentration of the *Agrobacterium* strain 104 was varied from 10⁴ to 10⁸ cells/ml. The transformation efficiency was determined by the number of transformants per 10⁵ cells. The data are the mean $\pm$ SD of three independent experiments. The asterisk indicates a significant difference ($P < 0.05$) from the control.
