# APPLICATION FOR DRILLING

MERIT ENERGY COMPANY
Dana Federal. Well No. 6
1650' FNL & 2310' FWL. Sec. 3-T9S-R25E
Chaves County, New Mexico
Lease No.: NM-35925
(Development Well)

In conjunction with Form 3160-3, Application for Permit to Drill subject well. Merit Energy Company submits the following items of pertinent information in accordance with BLM requirements:

- 1. The geologic surface formation is recent Permian with quaternary alluvium and other surficial deposits.
- 2. The estimated tops of geologic markers are as follows:

 San Andres
 400'

 Glorieta
 1455'

 Yeso
 1533'

 Abo
 3695'

 T.D.
 4800'

3. The estimated depths at which water, oil or gas formations are anticipated to be encountered:

Water: Random fresh water sands from surface to - 3001+/-.

Oil: None expected.

Gas: Possible in the Abo below 3695'.

- 4. Proposed Casing Program: See Form 3160-3.
- 5. Proposed Control Equipment: See Form 3160-3 and Exhibit "E".
- 6. Mud Program: See Form 3160-3.
- 7. Auxiliary Equipment: Blowout Preventer, Kelly cock.
- 8. Testing, Logging, and Coring Program:

Drill Stem Tests: None, unless warranted

Logging: T.D. to surface casing: CNL-LDT, and DLL w/selected RXO.

T.D. to surface: GR-CNL.

Coring: None planned.

9. No abnormal pressures or temperatures are anticipated. In the event abnormal pressures are encountered the proposed mud program will be modified to increase the mud weight. Estimated BHP = 1200 psi with 120° temperature.

HoS: None expected. None in the previously drilled wells in vicinity.

Anticipated starting date: December 2, 1992.
 Anticipated completion of drilling operations: Approximately 30 days.

#### MULTI POINT SURFACE USE AND OPERATIONS PLAN

MERIT ENERGY COMPANY
Dana Federal. Well No. 6
1650' FNL & 2310' FWL. Sec. 3-T9S-R25E
Chaves County, New Mexico
Lease No.: NM-35925
(Development Well)

This plan is submitted with the Application for Permit to Drill the above described well. The purpose of the plan is to describe the location of the proposed well, the proposed construction activities and operations plan, to be followed in rehabilitating the surface environmental effects associated with the operations.

#### 1. EXISTING ROADS:

- A. Exhibit "A" is a portion of a BLM Roswell Quadrangle map showing the location of the proposed well as staked, in relation to existing roads and highway. The well site location is approximately 11 road miles northeast of Roswell, New Mexico. Traveling northeast from Roswell, there will be approximately 11 miles of paved U.S. Highway 70 and .5 mile of gravel ranch/oilfield roads.
- B. Directions: Travel northeast from Roswell, NM on U.S. Highway 70 for approximately 10.1 miles past the overpass. Turn north, crossing a cattle guard, for .1 mile to the Dana Fed., #3 well site; then turn west on the access road to the Dana Fed., #4 for .1 mile. The proposed access road is staked on the north side of the road and will run northwest for 700 feet to the southeast corner of the staked location.

#### 2. PLANNED ACCESS ROAD:

- A. Length and Width: There will be approximately 700 feet of new access road 12 feet wide (24' Max.), which is color coded red on Exhibit "B".
- B. Construction: The proposed access road will be constructed by grading and topping with compacted caliche or gravel. The surface will be properly drained. The access road will vary in overall slope from .5 2.5%.
- C. Turnouts: None required.
- D. Culverts: None required.
- E. Cuts and Fills: None required.
- F. Gates, Cattleguards: None required.
- G. Off Lease R/W: None required.
- H. Existing Roads: All existing access roads will be maintained in as good or better condition.

#### 3. LOCATION OF EXISTING WELLS:

A. Existing wells within a one mile radius are shown on Exhibit "C".

Merit Energy Company Dana Federal, Well No. 6 Page 2

# 4. LOCATION OF EXISTING AND/OR PROPOSED FACILITIES;

- A. There are production facilities on the lease at this time.
- B. If the well proves to be commercial, the necessary production facilities, gas separation-process equipment and tank battery, if needed, will be installed on the drilling pad. A 2 3/8" gas pipeline will be buried a maximum of 24" and will run parallel with and 25 feet from the edge of the proposed and existing access road to an existing pipeline at the Dana Fed. #3 well site.

# 5. LOCATION AND TYPE OF WATER SUPPLY:

A. It is planned to drill the proposed well with fresh water that will be obtained from private or commercial sources and will be transported over the existing and proposed access roads. The water will be obtained from a well belonging to Marley and Rogers in NE% Sec. 33-T9S-R25E.

# 6. SOURCE OF CONSTRUCTION MATERIALS:

A. Caliche for surfacing the proposed access road and well site pad will be obtained from the location if possible or from a private commercial source, the Beavers Sand & Gravel Co., across the highway southeast of the location. The topsoil from the location will be stockpiled near the location for future rehabilitation use. No surface materials will be disturbed except those necessary for actual grading and leveling of the drill site and access road.

# 7. METHODS OF HANDLING WASTE DISPOSAL:

- A. Drill cuttings will be disposed of in the reserve/mud pit.
- B. Drilling fluids will be allowed to evaporate in the reserve/mud pit until the pit is dry.
- C. All pits will be fenced with normal fencing materials to prevent livestock from entering the area.
- D. Water produced during operations will be collected in tanks until hauled to an approved disposal system, or a separate disposal application will be submitted to the BLM for approval.
- E. Oil produced during operations will be stored in tanks until sold.
- F. Current laws and regulations pertaining to the disposal of human waste will be complied with.
- G. Trash, waste paper, garbage and junk will be contained in trash bins to prevent scattering and will be removed for deposit in an approved sanitary land fill within 30 days after finishing drilling and/or completion operations.

## 8. ANCILLARY FACILITIES:

A. None required.

Merit Energy Company Dana Federal, Well No. 6 Page 3

#### 9. WELL SITE LAYOUT:

- A. Exhibit "D" shows the relative location and dimensions of the well pad, waste pits, and major rig components. The pad and pit area has been staked and flagged, 400' X 400'.
- B. Mat Size: Maximum size: 260' X 185' plus 50' X 100' reserve pit, which will be cut 4 feet below the level surface on the north side of the pad.
- C. Cut & Fill: A 1-1.5' cut on the north with fill to the southeast will be required.
- D. The surface will be topped with compacted caliche or gravel with clay and the pits will be plastic lined.

#### 10. PLANS FOR RESTORATION OF THE SURFACE:

- A. After completion of drilling and/or completion operations, all equipment and other material not needed for operations will be removed. Pits will be filled and the location cleaned of all trash and junk to leave the well site in an aesthetically pleasing a condition as possible.
- B. Any unguarded pits containing fluids will be fenced and screened until they are filled.
- C. If the proposed well is non-productive, all rehabilitation and/or vegetation requirements of the private surface owner or the Bureau of Land Management will be complied with and will be accomplished as expeditiously as possible. All pits will be filled and leveled as soon as the pits are dry enough to work.

# 11. OTHER INFORMATION:

- A. Topography: The proposed well site and access road are located on the upland undulating terraces west of the Pecos River. The location is on the south side of a southeast to northwest .5 to 2.5% slope from an elevation of 3562.9' G.L.
- B. Soil: The topsoil at the well site is a reddish brown sandy loam mixed with considerable fine gravel. The soil is part of the Dona Ana sandy loam association.
- C. Flora and Fauna: The vegetation cover is a fair grass cover of three-awn, dropseed, grama, and fluff grass along with plants of mesquite, yucca, cacti, broomweed, fourwing saltbush, sage and miscellaneous weeds and wildflowers. The wildlife consists of antelope, coyotes, rattlesnakes, lizards, dove, quail and other wildlife typical of the semi-arid desert land.
- D. Ponds and Streams: The Pecos River is less than 1 mile northeast of the location.
- E. Residences and Other Structures: None in immediate vicinity.
- F. Land Use: Cattle grazing.

Merit Energy Company Dana Federal, Well No. 6 Page 4

### 11. OTHER INFORMATION;

cont.....

- G. Surface Ownership: The proposed well site and access road is on fee surface, owned by James Cliett, 709 La Fonda, Roswell, NM 88201. The minerals are Federal.
- H. There is no evidence of any significant archaeological, historical or cultural sites in the area. An archaeological survey was conducted by Archaeological Survey Consultants, P. O. Box D, Roswell, NM 88202, and their report will be submitted to the appropriate government agencies.

#### 12. OPERATOR'S REPRESENTATIVE:

A. The field representative for assuring compliance with the approved surface use and operations plan is as follows:

Mark Hamilton
Merit Energy Company
P. O. Drawer 8249
Roswell, New Mexico 88202
Home Phone: (505) 622-9062
Mobile Phone: (505) 625-6135

#### 13. CERTIFICATION:

I hereby certify that I have inspected the proposed drill site and access route; that I am familiar with the conditions which presently exist; that the statements made in the plan are, to the best of my knowledge, true and correct; and, that the work associated with the operations proposed herein will be performed by Merit Energy Company and its contractors and subcontractors in conformity with this plan and the terms and conditions under which it is approved. This statement is subject to the provisions of 18 U.S.C. 1001 for the filing of a false statement.
