We propose to drill this well to 4000' and complete it in the Grayburg and San Andres.

Water and native mud will be used to 200' from T.D.

Salt gel will be used the remainder of the hole.

All zones indicating porosity will be acidized or sand fraced.

A 10" 3000# blowout preventor will be used during drilling operations.

Exp. Int. 2.12.96

IN ABOVE SPACE DESCRIBE PROPOSED PROGRAM: If proposal is to deepen or plug back, give data on present productive zone and proposed new productive zone. If proposal is to drill or deepen directionally, give pertinent data on subsurface locations and measured and true tracked depths. Give blowout MINERALS MEMT. SERVICE preventer program, if any.
