Notification of Plans to Drill
and Rehabilitation for
New Mexico DP State, Wells 2
through 12, Section 28, T20S,
R28E, Eddy County, New Mexico

Mr. Earl Cunningham, District Manager
Bureau of Land Management
P. O. Box 1397
Roswell, NM 88201

Dear Mr. Cunningham:

Attached is a topo map showing proposed locations and proposed access routes for the above wells which are located on BLM administered surface and state minerals. A surface use plan is not required.

These locations were shown to Don Peterson of the Carlsbad BLM office on February 3, 1984, and no objection was expressed concerning the proposed operations.

Rehabilitation will consist of covering the trash and reserve pits, recontouring the areas as needed, and ripping to a depth of 12" the affected surfaces. Rehabilitation would occur when areas are no longer needed for operations.

An archaeologist will be contracted by Exxon to check the road routes and locations.

Sincerely,

Melba Knipling

Melba Knipling
