17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

The Osage Federal #6 was permitted on November 1, 1988 to a total depth of 6000'. Approval was given to drill on November 30, 1988. Since then Siete had proposed to move the location to 380' FSL & 790' FWL and submitted a new plat. Siete Oil and Gas Corporation respectfully requests to amend the total of 6000' to 9500', with the Bone Spring being the main objective. Due to the fact that we wish to deepen the total depth, we request that the original location of 990' FSL & 660' FWL be re-instated as the primary location. Attached is a C-102 with the original location survey.

18. I hereby certify that the foregoing is true and correct
