

Enron Oil & Gas Company
James Ranch Unit, Well No. 33
660' FNL & 1980' FEL
Sec. 1, T23S, R30E
Eddy County, New Mexico

9. WELL SITE LAYOUT:

Exhibit #5 shows the relative location and dimensions of the well pad, steel mud pits, burial pits and location of major rig components. Pad area has been staked and flagged.

Only minor leveling of the well site will be required.

10. OTHER INFORMATION:

The area around the well site is grassland and the top soil is duned and sandy. The vegetation is native scrub grasses with abundant oakbrush, sagebrush, yucca, and prickly pear.

There is no permanent or live water in the immediate area.

Copy of cultural resources examination was completed by Archaeology Survey Consultants. (ASC Job 93-126 dated June 9, 1993.)¹

11. OPERATORS REPRESENTATIVE:

The field representative responsible for assuring compliance with the approved surface-use and operations plan is as follows:

Mr. Dewey Smeltzer
3321 Neely
