- ☐ Abandonment  
☐ Recompletion  
☐ Plugging Back  
☐ Casing Repair  
☐ Altering Casing  
☒ Other Move surface location of well  
☐ Change of Plans  
☐ New Construction  
☐ Non-Routine Fracturing  
☐ Water Shut-Off  
☐ Conversion to Injection  
☐ Dispose Water

(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

It is proposed to drill vertical holes to 4070' and to set and cement intermediate casing and to drill a directional hole under the potash deposits and onto a standard location for the Delaware formation in Sec. 20-23S-31E.

An APD was previously filed and was approved for drilling on 12/17/93 at a surface location of 10' FSL & 135' FWL of Sec. 16-23S-31E. On 12/16/93 Craig Cranston with the BLM called to advise that a surface location 625' west of the approved location at 10' FSL & 480' FEL of Sec. 17-23S-31E would also be approved for drilling. There would be no change in the bottomhole location. Therefore, since this surface location will reduce the direction displacement of the wellbore and result in a significant savings in drilling costs, it is our proposal to move the surface location of the well.

Please see attachments with previously filed amended APD dated 3/1/94.
