Re: Section 36, T22S R30E
Eddy County, New Mexico

Dear Hansen:

I cannot release a trace of our LMR in section 36. I will, however, indicate those areas in section 36 where Western Ag-Minerals will not protest drilling of holes requiring a 1/4 mile buffer. Hole locations in the NE 1/4, SE 1/4, and 920' or more from the west line in the SW 1/4 will not be protested.

Any well locations in the NW 1/4 will be protested because they will result in further loss of potash reserves.

If I can be of more assistance or if you have any questions don't hesitate to call. I can be reached at (505) 887-3476.

Sincerely,

Ben F. Zimmerly
Mining Engineer

BLM approves federal wells in potash area so we do not have to worry about this.

STATE & FEE LEASES

Post to map and if within the potash area outlined on map or within 1 mile of that area do the following:

- 1) Make certain operator has filed a plat of the area showing the potash lessees for the area where the well is located as well as the 1-mile radius referred to.
- 2) Make certain operator has notified all of the potash lessees by certified mail of the APD. They must send copy of delivery notice to us since 20-day waiting period starts from delivery date.
- 3) Send letter to BLM and SLO advising them of this APD and request they advise if this location is within LMR or buffer zone.

BUFFER ZONE -- shallow well is 1/4 mile of LMR
-- deep well is 1/2 mile of LMR

- 4) If application is within LMR or buffer zone you must DENY it under R-111-P unless, there is a mutual agreement of lessor and lessees of oil & gas and potash interests. Copy of this agreement must be submitted with APD.
- 5) If application is outside LMR or buffer zone and no objection is received within 20 days from date of receipt by potash lessees of certified notice, the APD may be approved.
