If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

A north/south trending fence runs approximately 130' east of the proposed location. In order to build a drilling pad for the proposed well we will be required to move the fence to east. Attached is an agreement between Santa Fe Energy Operating Partners, L.P. and Mr. Wayne Gregory to move the fence as necessary to drill the well. We have also negotiated a right of way for the access road to cross Mr. Walter Beibelle's private surface located north of the proposed well.
