

DRILLING PLAN

Attachment to BLM Form 3160-3

Journey Operating, L.L.C.

Well: Sundance B Federal #26

1980' FNL, 660' FEL

Section 4, T24S, R31E

Eddy County, New Mexico

1. Surface Geological Formation

Quaternary Formation

2. Estimated Tops of Geological Markers

<u>Formation</u>	<u>TVD</u>
Rustler	665'
Castile	1000'
Lamar Shale	4250'
Bell Canyon	4285'
Cherry Canyon	5360'
Brushy Canyon	6710'
Bone Spring	8135'

3. Estimated Tops of Possible Water, Oil, Gas or Minerals:

Sands above 600'	Water
Cherry & Brushy Canyon	Oil or Gas

4. Pressure Control Equipment

<u>Interval, TVD</u>	<u>Pressure Control Equipment</u>
0' - 650'	No pressure control required
650' - TD	11", 3M psi double ram preventer with 3M psi annual preventer

Exhibits 1, 2 and 3 show the BOP stack arrangement, the choke manifold arrangements and the BOP specifications, respectively. The BOPE will be hydraulically tested per BLM requirements outlined by Onshore Oil and Gas Order No. 2. Pipe rams and blind rams will
