No remediation has been executed at this time due to the combination of reduced resources, holiday schedules and winter conditions.

Steve,

Did BP Do anything in the previous 90 days? If not how come?

Thanks Cory,

Due to muddy conditions, we request to begin a dig and haul, tentatively starting next week. Please allow until the end of February to complete field work and another 60 days for reporting.

This proposal will be dependent on pending weather moving in later this week and early next week. BP will have a planning meeting on site later this morning. I will keep you up to date if there are any changes.

No remediation has been executed at this time. The incident number is referenced above.

Steve,

To request an extension, you just need to email me with the Incident#, what BP has done to remediate the spill, why BP needs an extension, and when BP expects the remediation to be completed.

Cory – We are looking to perform a dig and haul on the produced water spill from October, however, we are hitting

weather. What is the proper means to extend the deadline to complete remediation?

This is a low risk, produced water spill that occurred on 10/11/2019. The vertical extent of the spill is expected to be 2-3'. Below is a link to the initial C-141.

http://ocdimage.emnrd.state.nm.us/Imaging/FileStore/aztec/wf/20191211/30045130750000_12_11_2019_02_55_35.pdf

Please let me know, thank you.
