13 Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

Dominion request permission to complete the subject well in the Chacra & commingle production downhole with the existing Basin Dakota Pool, as follows: Squeeze off Mesaverde w/200 sx cmt., perf Chacra f/3,058' - 3,074' & 3,142' - 3,152'. Acidize/Stimulate Chacra via 2 3/8" tbg., DO cmt. over Mesaverde. DO CIBP over Dakota @ 6,510', commingle Dakota & Chacra.

The Basin Dakota (71599) & the Otero-Chacra (82329) Pools are pre-approved for downhole commingling per NMOCD order R-11363. The working, overriding, and royalty interest owners in the proposed commingled pools are identical, therefore, no notification of this application need be submitted via certified mail (return receipt).

Dominion recommends volumetric analysis be used as the basis for the production allocation. Volumetric analysis would allocate 53% of gas and 100% of the oil production to the Dakota and 47% of the gas to the Chacra. Commingling production downhole in the subject well from the proposed pools will not reduce the value of the total remaining production.
