Attn: Mr. Drew Carnes

**Re: Injection Pressure Increase
Salty Dog Well No. 3R
SWD-866 API: 30-045-31274
San Juan County, New Mexico**

Dear Mr. Carnes:

Reference is made to your request dated February 5, 2003, to increase the surface injection pressure on the above referenced well. This request is based on a step rate test conducted on this well on February 3, 2003. The test results have been reviewed and we feel an increase in injection pressure is justified at this time.

Without modifying the injection interval or the tubing size or type, you are authorized to inject at or below the following surface injection pressure.

Well, Top Perforation, Formation	Maximum Surface Injection Pressure
Salty Dog Well No. 3R, Top Perforation 6,968 feet, Entrada Formation	1,800 PSIG 0.26 psi/foot
Located in Unit A, Section 28, Township 30 North, Range 14 West, NMPM, San Juan County, New Mexico.	

The Division Director may rescind this injection pressure increase if it becomes apparent that the injected water is not being confined to the injection zone or is endangering any fresh water aquifers.

Sincerely,

Lori Wrotenbery
Director
