Above well was spud 9/3/1980 and completed 4/23/1981. The BS Mesa Gallup was perf'd and found non-productive and never produced. Gallup was T&A'd July 29, 1981 when sleeve in the casing was pulled over the Gallup perms. The Dakota formation was also perf'd when the well was originally drilled. The Dakota has produced from that time and continues to be the only productive sand.

CDX Rio, LLC purchased this well from BP America Production effective 1/1/04.
Packer leakage test to be performed and submitted by CDX.
