Re: NMNM-060402A (WC)
3162.3-2 (7100)

Dear Sir:

We attempted to recompleate in the lower Dakota but were unsuccessful in our attempt.

We are evaluating a completion attempt in the Fruitland but have not reached a conclusion.

We would like to continue this study for an additional 180 days.

We plan on drilling a new well in this section this summer. We feel it will tell us which Fruitland strata is productive and permit us to recompleate this well.

Very truly yours,

ROCANVILLE CORPORATION

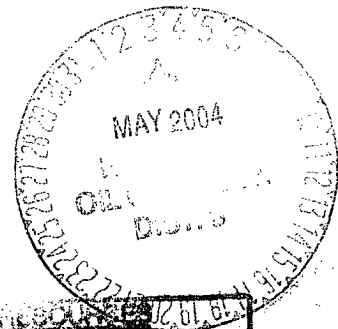

W. H. Hudson
