This well is, for now, only producing from the Blanco Mesaverde. A CIBP was set at 6500' in order to TA the Basin Dakota until the Mesaverde declines in production. ConocoPhillips will then go back in and pull the plug and commingle the well in the Mesaverde and Dakota as per DHC# 1154AZ. Daily Summaries attached.

14. I hereby certify that the foregoing is true and correct.
