13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Rig on location for PayAdd in Mesaverde formation.

Based on CBL ran on the subject well and pressure test on casing it appears that the cement behind the 7" casing from 3810' to surface is spotty. BP recommends running a liner from surface to the base of the 7" casing @ 4998' and cementing to surface. We anticipate cementing the liner in a two stage process. The lower cement will be normal weight while the cement at the interval from 3810' will be lighter weight with the intent to force some cement behind the 7" casing. Attached is a copy of the CBL and a well bore sketch for the subject well.

14. I hereby certify that the foregoing is true and correct.
