☐ Water Shut-Off

☐ Conversion to Injection

☐ Dispose Water

(Note: Report results of multiple completion on
Completion or Recompletion Report and Log form.)

13. Describe Proposed or completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Merrion Oil & Gas had proposed to stimulate the subject well in attempt to return it to production. We have changed the scope of the project and now plan to put the well on to pump thus delaying the project schedule. The job was scheduled for the week of August 23, however, El Paso Field Services scheduled plant a shut in for all the wells in this area. The stimulation is now planned for August 31, 2004. We will not have results from the project by the August 31 deadline, therefore we request an additional 30 days to complete and report results on the project.

14. I hereby certify that the foregoing is true and correct
