13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Production from this well has not reached the original anticipated volume, which we believe is in part due to the original fracture treatment.

We intend to re-fracture this well with 70Q Nitrogen foam single stage frac using 175,000# of 20/40 Brady sand. No new perfs are planned for this formation.

We will use a blow back tank for returns, so no pit will be required. All equipment will be placed on the existing well pad.

We plan to begin work September 8, 2004, due to rig availability.

CONDITIONS OF APPROVAL
Adhere to previously issued stipulations.
