Sundry Notices and Reports on Wells

1. Type of Well
GAS

2. Name of Operator
BURLINGTON
RESOURCES OIL & GAS COMPANY LP

3. Address & Phone No. of Operator
PO Box 4289, Farmington, NM 87499 (505) 326-9700

4. Location of Well, Footage, Sec., T, R, M
1265' FNL, 1725' FWL, Sec. 36, T-30-N, R-6-W, NMPM, Rio Arriba County

API # (assigned by OCD)
30-039-27258
5. Lease Number
6. State Oil&Gas Lease #
E-347-22
7. Lease Name/Unit Name
San Juan 30-6 Unit
8. Well No.
444S
9. Pool Name or Wildcat
Basin Fruitland Coal
10. Elevation:

	<input type="checkbox"/> Water Shut off
	<input type="checkbox"/> Conversion to Injection

13. Describe Proposed or Completed Operations

It is intended to drill the subject well into the main Pictured Cliffs formation to a total depth of 3626' in order to facilitate more efficient operations and gas recovery from the Fruitland coal. It is anticipated the Pictured Cliffs will not be productive in this wellbore based on the results of the nearest Pictured Cliffs test. The San Juan 30-6 Unit #132 (1895' FNL, 1155' FEL, Sec. 36, T-30-N, R-6-W) was drilled and completed mid year of 2000. Wireline logs showed some gas effect cross-over on the porosity logs and a large modern stimulation was utilized. Despite our best efforts we were unable to get this well to produce and plugged it in May of 2002. The additional footage will still keep TD within the main Pictured Cliffs formation and we will employ a mud logger to monitor gas shows to ensure no unexpected gas is encountered.
