13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleation in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

It is intended to deepen the existing Basin Fruitland Coal well to approximately 3288' into the Pictured Cliffs formation. It is anticipated the Pictured Cliffs is not productive in this wellbore. The existing tubing and liner will be pulled. The hole will be circulated clean. Additional footage will be drill (approximately 85' below current total depth or last significant coal) and again the hole will be cleaned. The well will then be reconfigured with a 5 1/2" 15.5# J-55 liner set at approximately 3038-3288'. A mud logger will be utilized to monitor any Pictured Cliffs gas.

14. I hereby certify that the foregoing is true and correct.
