13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

On 04/06/2004, BP America Production Company submitted an application for permit to drill the subject well to a total depth of 2300 (into the Pictured Cliffs Pool), set a CIBP above the Pictured Cliffs and complete the subject well into the Basin Fruitland Coal Pool. Approval was granted on 05/20/2004. Subject well was spud on 07/03/2004 and drilled to TD. BP now request permission to completed the well into the Aztec Pictured Cliffs Pool at an approximate interval of 2160 to 2235 (CIBP is currently set @ 2240), establish production for stabilized well test, and then isolate the PC by setting a CIBP @ approximately 2150 and completing into the Fruitland Coal Pool. After completion into the FC and establishing production rate, we will drill out the CIBP and downhole commingling production in the subject well.

The Basin Fruitland Coal (71629) & the Aztec Pictured Cliffs (71280) Pools are Pre-Approved for Downhole Commingling per NMOC Order R - 11363. The working and overriding royalty interest

*NO ORDER YET - 9-8-04 DHC-1610*

14. Thereby certify that the foregoing is true and correct.	
Electronic Submission #34359 verified by the BLM Well Information System For BP AMERICA PRODUCTION COMPANY, sent to the Farmington Committed to AFMSS for processing by MATTHEW HALBERT on 08/27/2004 ()

**32. Additional remarks, continued**

owners in the proposed commingled pools are identical; therefore no further notification of this application is required.

Production is proposed to be based on a fixed percentage. We will complete in the Aztec Pictured Cliffs Pool, establish production rate and isolate the PC; complete into the Basin Fruitland Coal, establish production; drill out the bridge plug and commingle production downhole. The deliverability test will be performed on the combined zones and PC rate will be subtracted from the total well stream to establish the FC rate.

Commingling Production Downhole in the subject well from the proposed pools with not reduce the value of the total remaining production.
