RISK ANALYSIS FOR EARTHEN PIT CLOSURE

Burlington Resources requests closure of the earthen pit at this location using a limited risk analysis based upon the following conditions:

1. The pit is not located inside the NMOCD defined Vulnerable Areas.
2. Groundwater is estimated to be at a depth greater than 100 feet.
3. The pit is not located within the Wellhead Protection Area - within 200 feet of a private domestic water source or within 1000 feet of all other water sources.
4. The pit is located greater than 1000 feet to surface water.
5. The soils from below the pit bottom were analyzed to provide a record of the benzene, Total BTEX, and Total Petroleum Hydrocarbons (TPH) levels. Total Petroleum Hydrocarbons (TPH) levels were less than 10,000 ppm.

Burlington Resources believes that the earthen pit poses minimal threat to groundwater, human health and the environment.
