13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

XTO Energy Inc. proposes to downhole commingle production from the Basin Dakota and Blanco Mesaverde pools per the attached documents.

**CONDITIONS OF APPROVAL**  
**Adhere to previously issued stipulations.**

PULL OR ALTER CASING ☐ MULTIPLE COMPLETION ☐

SUBSEQUENT REPORT OF:

REMEDIAL WORK ☐ ALTERING CASING ☐  
COMMENCE DRILLING OPNS. ☐ PLUG AND ABANDONMENT ☐  
CASING TEST AND CEMENT JOB ☐

OTHER: DOWNHOLE COMMINGLE ☒

OTHER: ☐

13. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 1103. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

XTO Energy Inc. requests an exception to Rule 303A to downhole commingle production from the Basin Dakota pool (71599) and the Blanco Mesaverde pool (72319). See attachments 1-3 for supporting documentation. Plats for this well are also included. The APD for this well has not been approved but we expect approval shortly. XTO requests approval to DHC both zones on initial completion. Ownership is diverse in both zone's spacing units and interest owners have been notified via certified letter, return receipt.

A sundry notice has been filed with the BLM Farmington office.

APPROVED BY \_\_\_\_\_ TITLE \_\_\_\_\_ DATE \_\_\_\_\_

Conditions of approval, if any:

Attachment 1  
Martinez Gas Com G #1F  
Sec 24E, T29N, R10W  
C-103 NOI Sundry to DHC  
5/11/04

Required conditions per Rule 303C(1):

All other conditions stipulated in Rule 303C (1) a, b, d, e, f, g & h are met.

- (c) Using the NMOCD fracture parting pressure gradient of 0.65 psig per foot of depth, the bottomhole pressure to frac the Mesaverde (est. top perf 3,800') is 2,470 psig and to frac the Dakota (est. top perf 6,400') is 4,160 psig. Because of offset drainage neither zone's current bottom hole pressures (est. 1,000 psig -1,800 psig) are expected to exceed the frac parting pressure of either zone.

Additional information per Rule 303C(3)(b):

- (i) Division Order R-11363 established the pre-approved pool combination for downhole commingling these pools.
- (ii) The pools to be commingled are:  
Blanco Mesaverde Pool (72319)  
Basin Dakota Pool (71599).
- (iii) Blanco Mesaverde perforations: 3,800' – 4,500' (est. perf interval)  
Basin Dakota perforations: 6,400' – 6,800' (est. perf interval)
- (iv) The proposed gas and oil production allocation percentages are based on average estimated ultimate recovery per completion of the 64 Mesaverde and 52 Dakota completions in a 16 section area around the proposed well location. Water production will be allocated identical to the oil production allocation. See Attachments 2, 3, 4 and 5 for the calculations and supporting data of the proposed production allocation percentages.

**Proposed Allocation Percentages:**

|                         | <b>GAS</b>   | <b>OIL</b>   | <b>WATER</b> |
|-------------------------|--------------|--------------|--------------|
| <b>Blanco Mesaverde</b> | <b>44.3%</b> | <b>42.9%</b> | <b>42.9%</b> |
| <b>Basin Dakota</b>     | <b>55.7%</b> | <b>57.1%</b> | <b>57.1%</b> |

- (v) Downhole commingling will not reduce the value of the total remaining production. Increased ultimate recovery is expected due to a lower economic production limit for each pool resulting lower operating cost per zone due to the combined production. Also, the reserves will be recovered in less time by downhole commingling.
- (vi) Working and royalty interest ownership in the Dakota and Mesaverde spacing units in this well are not identical. XTO Energy Inc. notified the owners of our plans to downhole commingle by certified mail (return receipt) on 4/7/03. No objections were received within the 20 day objection period.
- (vii) The Dakota and Mesaverde spacing units (N/2, Sec 24) do not contain State lands or minerals so a copy of the Form C-103 was not sent to them. The well is located on a Federal lease. A copy of the Form C-103 with attachments was sent to the BLM using Sundry Notice Form 3160-5.

RE: Notice of Intent to Apply for Downhole Commingling  
Martinez Gas Com G #1F  
Sec 24E, T29N, R10W  
San Juan County, NM

To all working interest, royalty interest and overriding royalty interest owners:

XTO Energy Inc. plans to apply for permission to downhole commingle the Basin Dakota and the Blanco Mesaverde Pools in the Martinez Gas Com G #1F. This well is a proposed new drill well. Notices were sent to working interest owners in 2004; however, the well location was changed from the NENW quarter/quarter to the SWNW quarter/quarter. Hence our second notification to owners regarding potential downhole commingle. We estimate that it will be spud in early July, 2003. We plan to downhole commingle production from both pools on initial completion. NMOCD requires all interest owners be notified of intent to downhole commingle if ownership is different between pools.

Both of these pools are included in the New Mexico Oil Conservation Division pre-approved pool combinations for downhole commingling in the San Juan Basin. The proposed gas and oil production allocation percentages are based on the average estimated ultimate recovery per completion of the 64 Mesaverde and 52 Dakota completions in a sixteen section area around the proposed well location. Water production will be allocated identical to the oil production allocation. XTO Energy Inc. proposes to allocate the commingled production as follows:

| POOL             | Gas   | OIL   | WATER |
|------------------|-------|-------|-------|
| Blanco Mesaverde | 44.3% | 42.9% | 42.9% |
| Basin Dakota     | 55.7% | 57.1% | 57.1% |

If you need additional information or have any questions, I can be contacted at (505) 324-1090. If you are opposed to commingling production from these two pools please respond in writing within 20 days of the date of this letter to:

XTO Energy, Inc.
