of starting any proposed work). SEE RULE 1103. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.				
Burlington Resources proposes to construct a workover pit. Based on Burlington's interpretation of the OCD's risk ranking criteria, the workover				
pit will be a lined pit as detailed in Burlington's Drilling / Workover Pit Construction / Operation Procedures dated April 26, 2004 on file at the				
NMOCD office. Burlington Resources anticipates closing the pit according to the Drilling / Workover Pit Closure Procedure dated August 2, 2004				
on file at the NMOCD office.				
On this well, a blow/flare pit may be the only pit that will be required. Under this circumstance, a portion of this blow/flare pit will be designed to manage fluids, and that portion will be lined, as per the risk ranking criteria.				
manage nuices, and that portion will be inted, as per the risk failking effects.				
I hereby certify that the information above is true and complete to the best of my knowledge and belief. I further certify that any pit or below-				
grade tank has been/will be constructed or closed according to NMOCD guidelines, a general permit
