13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

On 11/17/2004 we were notified that we had a well blowing gas, and upon response found that the plunger in the well had hit the lubricator with enough force to break the top of the lubricator. The gas release was over a number of days beginning 11/10/2004. Our automation showed the well was still flowing, however it was not. The automation transmitters were out of calibration, and did not allow faster detection of lubricator breach. Transmitters will be calibrated. The released volume was 600 MCF.

CONDITIONS OF APPROVAL
