13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

The subject well produces downhole commingled from both the Pictured Cliffs and Dakota formations. The Pictured Cliff formation keeps sanding out and plugging the pump, causing the well to be shut-in and requiring numerous workovers to clean out and reset the pump. In order to reduce workovers and return the Dakota to production, Four Star requests approval to abandon the Pictured Cliffs formation.

The procedure to abandon the Pictured Cliffs formation is as follows:

Set a composite bridge plug @1760' below the PC perms @ 1638'-1734'
Squeeze the Pictured Cliffs with 250 sxs of Class "G" cement.
Wait on cement and drill cement out to CBP and test casing to 500#.
If casing holds drill out CBP, stimulate as needed and return Dakota to production.

14. I hereby certify that the foregoing is true and correct.
