Pampa, Texas, July 3, 1952

Jicarilla Tribal  
Well No. 1 is located 790 ft. from S line and 840 ft. from W line of sec. 21  
SW $\frac{1}{4}$  of SW $\frac{1}{4}$  Sec. 21 32-N 3-W N.M.P.M.  
( $\frac{1}{4}$  Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
Wildcat Rio Arriba New Mexico  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 7028 ft.

## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well, which was drilled to a total depth of 1659' with 8-5/8" casing set at 337' and cemented to the surface, did not encounter any commercially productive gas, oil, or water zones and has been plugged and abandoned as follows:

Hole was filled with heavy mud and three cement plugs spotted - 70 sack plug 1530'-1290'; 20 sack plug 370' to 305'; and 20 sack plug 65' to surface with a 4" pipe marker cemented at the surface. All mud and cement plugs were pumped in thru drill pipe. Completed spotting plugs at 2:30 P.M. 5-23-52. All surplus material has since been removed and the location cleaned and leveled.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
